

Center For Career Development, IITG

Software Developer Intern

May. 2026 - July. 2026

Onsite | Placement Portal | Intern Portal

Architected and deployed two centralized platforms, **Placement Portal** and **Intern Portal**, using **React**, **Ant Design**, **Redux Toolkit**, **Node.js/Express**, and **MongoDB**, securing **6** role-based access levels with **JWT** and **Google/Microsoft OAuth2 SSO**.

Built a **Multer**-based file upload pipeline with **MIME** validation, pluggable local-disk and **Azure Blob Storage** backends for resumes, CVs, and photos, alongside an internal **PDFKit/XLSX**-driven bulk export and reporting tools for coordinators.

Implemented an **HMAC-SHA256**-signed cross-portal data-sync integration and a push-notification pipeline to the CCD mobile app, containerized both platforms with **Docker** and automated deployments via **GitHub Actions** multi-stage CI/CD pipeline.

Sera Innovation

AI Engineer Intern

Dec. 2025 - Jan. 2026

Remote

Designed a **16-table normalized schema** on **GCP BigQuery** and **ArcadeDB** by analyzing multiple investor-facing decks.

Developed **PPT Extractor** pipeline using the **Groq API** to parse and auto-map raw deck text to structured schema fields.

Modeled entities like financials, traction, and fundraise rounds with **JSON columns** to handle variable year-over-year data.

PROJECTS

Medical College IT Infrastructure & App Suite

Freelance (Contract)

Jul. 2025 - Feb. 2026

Copy Checker | EaseExit | Elective | Status

Architected end-to-end IT infrastructure & a **4-app suite** for a medical college of **2400+ UG/PG students** on a self-hosted **Oracle server** with multi-subdomain routing via **Nginx** reverse proxy; **Dockerized** services with secure **SSH** administration.

Built **Copy-Checker Portal** for remote answer-script evaluation by external examiners with **JWT-secured role-based access**; processed **8000+ copies** with zero downtime via **PM2**, **MongoDB**, **RESTful Node.js APIs** during peak evaluation cycles.

Developed **EaseExit** – Student–Parent–Warden–Guard leave-approval workflow with **Flutter** mobile app integrating **REST APIs & Firebase Cloud Messaging**, published on **iOS App Store & Google Play**; handled **15000+ leave applications** securely.

Engineered **Elective Portal** with high-concurrency **FCFS** allocation using **MongoDB atomic transactions**, **optimistic locking**, **compound indexing** & race-condition handling; allotted **500+ seats across 50+ courses** without overbooking or service bursts.

Designed **Status Dashboard** with **WebSocket**-driven real-time server health, service uptime/downtime, resource utilization & centralized **log aggregation** via **polling**, enabling proactive incident response and near-100% uptime across all services.

AI Website Generator

Gold Medal, Kriti 25 Inter-Hostel Tech Competition, IIT Guwahati

Jan. 2025 - Feb. 2025

Live Website | GitHub Repository

Developed a feature-rich and innovative **AI-powered website generator** using **React.js**, **Node.js**, **TypeScript**, **Express**, and **Claude AI API**, enabling users to describe a website in natural language and generate a functional, responsive site instantly.

Designed an interactive and user-friendly **dashboard** that enables real-time customization, comprehensive re-prompting support and reliable user experience with **one-click auto deployment** via **GitHub Pages** using an **async Pub/Sub** mechanism seamlessly.

Integrated **GRAPES.js** to build an editable dashboard, lets users dynamically modify, reposition, and customize components for a personalized experience along with a **persistent** state persistence feature to effortlessly restore previous site versions.

Live Placement Sheet

Center for Career Development, IITG

Nov. 2025 - Jul. 2026

Live Website | GitHub Repository

Built a real-time placement-day dashboard with **live event broadcasting** using **Socket.IO**, **Node.js/Express**, **MongoDB**, and **React**, deployed on **IITG servers via SSH**; supported **150+ POCs** and **1500+ students** during peak placement season.

Implemented **role-based access** across **5 roles** with live **offer creation**, POCs updating real-time **interview status** for each student, **admin-approved** confirmations, **jsPDF**-based export, auto-**blocking** students from further placements once placed.

Engineered a **single sign-on handoff** from the **Placement Portal** via short-lived **JWT**-signed tokens, re-verified server-side against the database before minting a fresh scoped session, with expired or replayed tokens automatically rejected outright.

Other Projects

Personal / Freelance

Mini PaaS Platform: Self-hosted **Vercel**-like PaaS with **Docker** deploys, webhook auto-redeploys & **NGINX** routing. **GitHub**

CCD, Company Listing Portal: Role-based platform tracking CCD’s company outreach pipeline securely. **Website** | **GitHub**

GeoNLI, (Inter-IIT Tech Meet 14.0): Built natural-language platform for satellite imagery, **Captioning**, **Grounding** & **VQA**.

E-Commerce (Nufab): Built whole platform, integrating with **Delhivery**, **Razorpay** & **GSAP**, processing **300+ orders**. **Website**

Fence Contractor Website (StagFencing): Website built for an Australian contractor with **Stripe** payment integration. **Website**

TECHNICAL SKILLS

Programming: C++, C, JS, Python, Golang*

Development: TypeScript, React, NodeJs, NextJs, ViteJs

Devops: GH Actions, Kubernetes, Apache, Jenkins*, ArgoCD

Operating System: Windows, Ubuntu, Linux*

Database: MongoDB, Redis, MySQL*

Miscellaneous: Git, Docker, LATEX*

* Elementary proficiency

KEY COURSES TAKEN

Electronics: Digital Electronics, Circuit Theory, Computer Networks, Blockchain Science, Data Structure & Algorithms

ACHIEVEMENTS

Hacktober Fest IITG: 1st (2024) & 2nd (2025) on leaderboard, among 1000+ participants both years.

2024 & 2025

LeetCode: Maintained a 250+ day streak, solving 520+ problems (250+ Medium, 120+ Hard) on DSA. (Profile)

2025-26

CodeForces: Attained CF rating: 1415(Specialist). Secured Global Rank 174 Educational Round 172. (Profile)

2025

Inter-IIT Bootcamp: Achieved 3rd position in the Software Dev AI-Chatbot PS released by Techboard IITG.

2024

POSITIONS OF RESPONSIBILITY

Lead Student Coordinator, CCD IITG: Built, deployed, maintained multiple portals on physical servers using Docker, SSH.

2025–26 | Live Website

WebOps Head, Cepstrum IITG: Managed 2000+ concurrent users with high-performance uptime.

2025–26 | Live Website

Web-Ops Head, Spirit IITG: Managing web operations of Spirit IITG with 3000+ concurrent visits.

2025–26 | Live Website

Web Operations Head, 3rd ICACC: Designed, built, and handled web operations of the 3rd International Conference on Agriculture and Centric Computation with 500+ concurrent users single-handedly.

2025–26 | Live Website

Transport Head, Techniche 2025, IITG: Owned end-to-end transport logistics for the fest, managing vehicle fleets and routing across all 3 days of D-Day operations, including large-scale movement coordination for Pronite and other events.

2025
